

VocaSafe Watch™

Communication anywhere. Anytime.

CROWDFUNDING FAQ

What is VocaSafe Watch™?

VocaSafe Watch™ is a waterproof smartwatch designed to support AAC (augmentative and alternative communication) users.

It bridges communication and safety by combining text-to-speech, visual icons, and GPS protection into a single, wearable device.

Who is it for?

VocaSafe Watch™ is created for nonverbal or minimally verbal individuals who rely on AAC to communicate — including children and adults with autism, speech delays, or developmental disabilities.

It's also valuable for families, therapists, and educators seeking communication tools that fit into real life — outdoors, near water, or in classrooms.

Why are you crowdfunding?

We're crowdfunding to complete the next stage of product development and pilot testing.

Your support helps us finalize the prototype, improve AAC compatibility, and begin early user trials with families and schools.

How will the funds be used?

Funds raised will be allocated toward:

- Hardware and software refinement
- Waterproof design testing and certification
- Manufacturing setup for pilot units
- App development and data security integration
- Community outreach and pilot program support

When will backers receive their rewards?

Backers will receive updates at every milestone.

Our estimated shipping and pilot launch timeline will be announced at the end of the crowdfunding campaign once production begins.

Can I participate in the pilot?

Yes! Families, schools, and therapy centers can join our pilot interest list.

Please complete the Pilot Interest Form on our website or download it directly from the "Resources & Forms" section.

Is VocaSafe Watch™ compatible with existing AAC systems?

Yes — the device is being designed to support communication through compatibility with leading AAC systems.

This ensures users can access familiar tools, vocabulary, and communication layouts from their wrist.

How can I help beyond donating?

You can support VocaSafe Watch™ by:

- Sharing our campaign on social media
- Introducing us to schools, therapists, and AAC professionals
- Signing up for pilot participation
- Providing feedback or testimonials once the campaign launches

Where can I contact the founder?
