

VocaSafe Watch™

Communication anywhere. Anytime.

BRAND STORY ONE-PAGER

Our Story

VocaSafe Watch™ was born from lived experience.

As a mother to Roy, who uses AAC to communicate, I saw how his voice could be limited by environment — water, weather, or distance from a device.

That moment became a mission: to create a wearable AAC companion that keeps communication possible wherever life happens.

Today, VocaSafe Watch™ stands for empowerment, inclusion, and safety — a bridge between technology and humanity.

Our Mission

To make communication and safety accessible anywhere, anytime. We believe every voice deserves to be heard, and every individual should have the tools to connect confidently with the world around them.

Our Vision

A world where no voice is lost to circumstance.

VocaSafe Watch™ envisions technology that travels with its user — waterproof, sensory-friendly, and smart enough to protect as it empowers.

What We Built

- AAC Integration: Compatible with leading AAC systems.
- Waterproof Design: Keeps speech accessible in every setting.
- Smart Safety + GPS: Adds a layer of protection for families and caregivers.
- Sensory-Friendly Straps: Comfort that adapts to every user.

Our Impact

VocaSafe Watch™ empowers users, caregivers, and educators alike — creating freedom through communication, inclusion through design, and confidence through safety.

Founder's Note

"VocaSafe Watch™ began with one small wristband and one big belief — that communication should never depend on location.

Together, we're giving every voice a chance to be heard."

— Catherine Katambo, Founder
