

VocaSafe Watch™

Communication anywhere. Anytime.

PRODUCT OVERVIEW SHEET

Overview

Empowering Communication, Safety, and Independence.

VocaSafe Watch™ is the first waterproof smartwatch designed to extend AAC communication beyond traditional tablets and devices.

It allows users to express themselves through voice, text, or symbols — even near water or outdoors — while providing built-in GPS safety and sensory-friendly comfort.

Key Features

- AAC Integration: Compatible with leading AAC systems for seamless access to communication.
- Waterproof + Durable: Built for real-world use — pool, playground, or classroom.
- Smart Safety + GPS: Real-time tracking and customizable safe-zone alerts.
- Sensory-Friendly Straps: Soft, adjustable bands designed for comfort and choice.
- Customizable Interface: Simplified layouts for quick phrase access and visual support.

Who It's For

Families, educators, and therapists supporting individuals who rely on AAC for daily communication — including those with autism, developmental disabilities, or speech differences.

Why It Matters

For many AAC users, communication stops when tablets can't be used outdoors or near water.

VocaSafe Watch™ bridges that gap — ensuring voices are never lost and safety is always within reach.

Technical Highlights (Prototype Stage)

- Waterproof housing (IP68 standard)
- Bluetooth and Wi-Fi connectivity
- GPS tracking system
- Rechargeable long-life battery
- Compatible with iOS and Android apps
- Touch-responsive AAC interface

Brand Mission

At VocaSafe Watch™, we believe communication is a human right — not a setting or location.

We're building technology that gives AAC users the power to communicate anywhere, anytime.
